

Strantell Services

Strantell helps laboratories, manufacturers, industrial service providers, and operations-heavy organizations transform scattered data into clear, actionable insight.

Core Focus

Power BI dashboards, KPI systems, reporting workflows, data modeling, and operational performance analysis.

COMMON BUSINESS CHALLENGES

Manual Reporting

Teams spend hours each week compiling spreadsheets, status reports, and recurring management updates.

Limited Visibility

Leaders lack timely visibility into performance, workload, bottlenecks, and KPI movement.

Inconsistent Data

Operational information is spread across files, systems, departments, and informal tracking methods.

Hidden Bottlenecks

Delays, quality issues, rework, and process constraints remain difficult to isolate and measure.

SERVICES

Dashboard Development

Custom Power BI dashboards, KPI scorecards, executive views, department reporting, and operational drilldowns.

Reporting Automation

Automated reporting workflows that reduce spreadsheet dependency and repetitive manual reporting effort.

Operational Analytics

Turnaround analysis, SLA monitoring, throughput analysis, bottleneck detection, trend review, and performance diagnostics.

Data Modeling

Data cleanup, validation, star schema design, KPI definitions, analytical models, and reporting foundations.

INDUSTRIES SERVED

Manufacturing

Production KPIs, downtime, defects, throughput, capacity, and operational reporting.

Mining

Operational support reporting, turnaround performance, workflow visibility, and production support analytics.

Laboratories

Sample volume, SLA compliance, turnaround time, re-runs, late samples, and bottleneck analysis.

Industrial Services

Service activity, field operations, work orders, response time, backlog, and performance visibility.

ENGAGEMENT PROCESS

1

Discovery

2

Assessment

3

Design

4

Build

5

Validation

6

Delivery

7

Support

Every engagement begins with a structured discovery process to understand operational objectives, existing reporting practices, available data sources, KPI requirements, and decision-making needs.

WHY STRANTELL

Operations Experience

Solutions are designed for real operational environments, not abstract reporting exercises.

Structured Delivery

Projects use clear documentation, repeatable workflows, validation steps, and professional handoff materials.

Decision-Focused Analytics

Dashboards are built to support management decisions, accountability, and continuous improvement.
